Supervisor's Certificate

This is to certify that the Mini Project Report entitled "**NSE Stock Analysis Dashboard**" submitted by [**Jash Kanojia (2023-B-18092005A), Devendra Rajpurohit(2023-B-13112005), Chinmay Joshi(2023-B-02092004), Raj Panwar(2023-B-19072004)**] is a record of original work carried out by him/her under my supervision and guidance in partial fulfillment of the requirements of the partial fulfilment Of the requirements of the Mid Term Evaluation of the subject **Introduction to Analytics with R (AD303E)** (at **School of Engineering, Ajeenkya DY Patil University, Pune, Maharashtra-412105**).

Dr. Vishal Shirsath

Supervisor

Abstract

Equipped with state-of-the-art smartphones and mobile devices, today's highly interconnected urban population is increasingly dependent on these gadgets to organize and plan their daily lives. These applications often rely on current locations of individual users or a group of users to provide the desired service, which jeopardizes their privacy; users do not necessarily want to reveal their current locations to the service provider or to other, possibly untrusted, users. This report, proposes algorithms for location privacy preserving of mobile users. By means of a targeted user-study, we attempt to get an insight into the privacy-awareness of users in location based services and the usability of the proposed solutions.

Index Terms - Mobile application, oblivious computation, privacy.

Contents

CHAPTER 1 : INTRODUCTION

1.1 Company Profile	1
1.2 Existing System and Need for System	2
1.2.1 Scope of Work	3
1.2.2 Operating Environment - Hardware and Software	9
1.3 Detail Description of Technology Used	11
1.4 Proposed System	12

CHAPTER 2 : METHODOLOGY

2.1 Company Profile	13
2.2 Existing System and Need for System	14
2.2.1 Scope of Work	15
2.2.2 Operating Environment - Hardware and Software	18
2.3 Detail Description of Technology Used	22
2.4 Proposed System	22

CHAPTER 3 : RESULTS AND DISCUSSION

3.1 Company Profile	23
3.2 Existing System and Need for System	24
3.2.1 Scope of Work	25
3.2.2 Operating Environment - Hardware and Software	28
3.3 Detail Description of Technology Used	29
3.4 Proposed System	32

CHAPTER 4 : CONCLUSION

4.1 Company Profile	33
4.2 Existing System and Need for System	34
4.2.1 Scope of Work	35
4.2.2 Operating Environment - Hardware and Software	37
4.3 Detail Description of Technology Used	39
REFERENCES	78
ANNEXURES	82
Annexure 1	83
Annexure 2	84

List of Figures

1.1	Distribution of disabled population by type of disability in India-2011	2
1.2	Corneo-retinal potential generating dipole model of the eye	4
1.3	Illustration of the EOG signal recording during the horizontal movements of the eyes	5

List of Tables

3.1	Arrangement of final processed amplitude values* in the arrays	28
3.2	LEDs and their indicative functions	31
3.3	Time domain features	32
3.4	Performance evaluation during testing	38
3.5	Elucidation of false negative results	39
3.5	Comparative analysis of performance indices of DTCL-based decision-making algorithm and KNN Classifier	41

List of Abbreviations

ALS	Amyotrophic lateral sclerosis
BCI	Brain-computer interface
DOF	Degree of freedom
DTCL	Dynamic threshold comparison logic
EEG	Electroencephalogram
EMG	Electromyogram
EOG	Electrooculogram
